

We are hiring

Production Manager

COMPANY

Delta Water Engineering

ABOUT US

Delta Water Engineering is a Belgian company active in the development, engineering, manufacturing, assembly and distribution of water treatment appliances. The company was established in 2004 and is currently located in Mortsel, a suburb of Antwerp (Belgium). Delta Water Engineering is part of Pollet Water Group, one of the leading water technology companies in Europe.

Our most important realization is our non-electric water softener. The classic ion-exchange water softener has been entirely re-engineered. The result are unique and revolutionary solutions, that are more compact, more efficient, more advanced and more user friendly than any other product on the market.

Our products are sold either under our own brand, Delta Water Engineering, or under the Private Label of our distribution partners. Our product range covers

LOCATION

Waesdonckstraat 1 . 2640 Mortsel . Belgium

solutions for residential, commercial as well as horeca applications. Through our network of dedicated distribution partners, we cover the European market as well as some key overseas markets. All of our partners are carefully selected, thoroughly trained and supported on a constant basis, to assure our products are professionally sold, installed and serviced. Together we share a common ambition and passion: making sure that the final user of our products is totally satisfied!

We pride ourselves in the fact that our products are truly 'locally made'; all components are either sourced from local vendors, or manufactured in-house, while all assembly and testing of our products is done in our own workshops, where we employ people from De Brug, a non-profit social employment enterprise. This way we minimize our 'ecological footprint', while maximally fulfilling our social duty as a local employer.

YOUR RESPONSABILITIES

- Daily management (planning & execution) of our:
- Manufacturing, consisting of 2 injection moulding machines, operated by 1 operator.
- Assembly cells/lines, operated by De Brug (approx. 20 operators and 3 supervisors).
- Daily follow-up of production related metrics and KPI's (Safety, Quality, Delivery, Cost).
- Lean and Continuous Improvement projects in the Production dept (5S, Optimization of Process & Material flow, Standard Work, Creform work cells, ...).
- Part of the company's Operations team, reporting to the Operations Manager.

We are hiring
